Software Engineer | C# | Python | Node.JS | Typescript | SQL | NoSQL | SaaS | Cloud |
Software Architect | Team player | Agile methodology | Dashboards | Data Engineering

Profile

I am a skilled full-stack developer with a strong track record of solving complex challenges and pursuing creative solutions. At the age of seventeen, before starting my undergraduate studies, I stood out in an OnBase course by Hyland Software and later hired by the company. Later, I pursued formal education in Information Systems to further strengthen my software development skills. I am proficient in Python, C#, Node.Js, TypeScript, and related technologies. I am committed to continuous professional growth and delivering high-quality results.

Academic Formation

FIAP (Brazil) – Complete in 2024

- Information Systems Bachelor with a grade mean of 8.5/10

Languages

- English: Fluent
- Portuguese: Native
- Spanish: Beginner

Professional Experience

Localiza (Software Engineer – Remote/Brazil): 2023 – Current.

- Development of Localiza's website backend focusing on keeping low latency and easy to use back-office applications.
- Development of chatbots that more than a million monthly users access with a NPS of 80+.
- Constant track of chatbots quality, improvement, and customer satisfaction.
- Front-end work on an internal platform for long-term pricing for cars.
- Team-wide reference in Agile methodology.
- Won a prize in Localiza's gamification for agile methodology and development.

Plink (Software and Data Engineer – Remote/USA): 2022 – 2024.

- Regex construction for billions of transaction data for hundreds of banking institutions in America.
- Built multiple dashboards to properly display all relevant data with direct contact with Plink's CEO.
- Development of a map generation tool that aggregates thousands of customers' data to display area of consumption of each Financial Institution and their customers districts.

Hyland Software (Technical Consultant – On-site/Brazil): 2019 – 2021.

- Multiple high-profile clients from medical and banking with high satisfaction.
- Planning and implementation of project for country-wide company audits for BSM (Brazilian stock exchange market supervision).
- Implementation of project for São Camilo's back-office IT department (Hospital Network with three units around São Paulo).
