Profile

I am a skilled full-stack developer with a 7-year track record of solving complex challenges and pursuing creative solutions. At the age of seventeen I started working in the IT industry and been passionate about software development. Since 2025, I've been working on a career transition to **Game Development** and working on small projects on Unity. In 2026 I got my first professional project and kept studying development in Unity, Godot and Game Design.

Academic Formation

Méliès (Brazil) – July 2025 – 2026

- Creative Executive Producing Post-Graduation focused on games and animation. Here I'm learning about game production beyond its development

FIAP (Brazil) – Complete in 2024

- Information Systems Bachelor with a grade mean of 8.5/10

Languages – English: Fluent – Portuguese: Native – Spanish: Beginner

Professional Experience

Contractor at Dreamwalkers (Game Developer – Remote/Brazil): 2026 – Current.

- Development of a Roguelike Deck Builder. Made in Unity
- Code made by hand with careful consideration of maintainability and SOLID principles
- Formally translating my Software Development experience into Unity's framework

Localiza (Software Engineer – Remote/Brazil): 2023 – 2026.

- Development of Localiza's website backend focusing on keeping low latency and easy to use back-office applications.
- Localiza is now an AI First Company, so I've learned a lot of AI enhanced development.
- Development of chatbots that more than a million monthly users access with a NPS of 80+.
- Constant track of chatbots quality, improvement, and customer satisfaction.

Plink (Software and Data Engineer – Remote/USA): 2022 – 2024.

- Regex writing for billions of transaction data for hundreds of banking institutions in the US.
- Built multiple dashboards to properly display all relevant data with direct contact with Plink's CEO.
- Development of a map generation tool that aggregates thousands of customers' data to display area of consumption of each Financial Institution and their customers districts.

Hyland Software (Technical Consultant – On-site/Brazil): 2019 – 2021.

- Multiple high-profile clients from medical and banking with high satisfaction.
- Planning and implementation of project for country-wide company audits for BSM (Brazilian stock exchange market supervision).
- Implementation of project for São Camilo's back-office IT department (Hospital Network with three units around São Paulo).
